Guest Editors:

**The Psychology of Boys at Risk:
Indicators from 0-5**

Hiram E. Fitzgerald, Paul Golding, and
Marvin McKinney

Boys at Risk

Boys are disproportionately at risk for school failure, juvenile criminality, and mental health problems—issues that usually become known and of concern in adolescence. In contrast to the teenage focus, this conference will explore the roots of boys being at risk in early childhood, focusing on factors from 0 to 5 and asking how these circumstances are related to later outcomes.

santafeboys.org

Boys at Risk

The Psychology of Boys at Risk: Indicators from 0-5 should be of interest to scholars, practitioners, and policy makers concerned with the development of young males, and children generally, of all ages.

The conference is being held in conjunction with the *Infant Mental Health Journal*. Many of the presenters are authors of articles to be published in a special issue on the psychology of boys at risk. Their presentations will be based on empirical research, some from decades-long studies exploring the longitudinal connections between early development and later problematic behaviors. They will address the subjects listed below:

- **Longitudinal study** of early deprivation and later outcomes for boys.
- **Young boys' vulnerabilities** around self- and social-emotional regulation.
- **Toddler predictors** of adolescent antisocial behavior.
- **Boys' longitudinal outcomes** in the context of family risk for alcoholism.
- **Development of boys** in ethno-racial contexts.
- **Risk factors** in Hispanic, African American, and American Indian/Alaska Native contexts.
- **Affective neuroscience** and boys' development.
- **Testosterone**, boys' psychology, and behavior.

Call for Presentation Proposals

In addition to the invited presenters, the conference will provide opportunities for scholars, practitioners—including community-based—and policy makers to present in symposia, workshops, and poster sessions on subjects and research related to the theme of the conference.

Interested individuals should go to the Conference tab at santafeboys.org for information on submitting presentation proposals.

Continuing Education Units (CEUs) will be available.

Getting to the Conference

The main access point to Santa Fe is the Albuquerque Sunport Airport (ABQ), 75 minutes south of the city. Santa Fe also has its own airport (SAF) with limited commercial service from Dallas, Phoenix, Los Angeles, and Denver. The Santa Fe Airport is 20 minutes from downtown. Both airports offer shuttle services to the hotel.

Santa Fe & New Mexico

The Eldorado Hotel will host the conference in historic downtown Santa Fe—a beautiful and unique city to visit. One of the oldest continuously inhabited places in North America, Santa Fe and the city's architecture and museums evoke the region's Native American, Spanish, Mexican, and cowboy pasts. In addition to its abundant modern art galleries, restaurants, and cultural events, Santa Fe is the capital of the State of New Mexico, which, according to the Annie E. Casey Foundation's *Kids Count* publication, is consistently among the lowest rated states in terms of children's well-being. Both in terms of its cultural history and the struggle to promote modern mental health for its young citizens, the site of this event will offer participants much to think about.
